# ASHWINI ANNAVI

Mob. No.:- +917708302808

Gmail ID :- ashwiniash200219@gmail.com

LinkedIn: https://www.linkedin.com/in/ashwini-a-790a20224/

## Skills

- **Languages:** Python, SQL
- **Frameworks/Libraries:** TensorFlow, Pandas, NumPy, Matplotlib
- **Tools:** MS Office, Power BI
- **Core Areas:** ETL Workflow, CI/CD

## Certification

**Java J2EE —** Wipro May 2022 – Sep 2022

## Profile Summary

Motivated and detail-oriented Computer Science Engineering student with practical experience as a Research Analyst. Skilled in Python, SQL, ETL workflows, and data preprocessing, with basic understanding of machine learning concepts. Comfortable working with Pandas, NumPy, TensorFlow, and familiar with tools like Power BI, VS Code, and GitHub to support data-driven projects.

## Work Experience

**Research analyst —** Research Bridge Lab Apr 2023 - Present

- Designed and automated large-scale ETL workflows and SQL-based data pipelines using Python, Pandas, and NumPy.
- Developed modular, reusable, and maintainable research software components using version control and clean code practices.
- Implemented visualization systems using Power BI and Matplotlib to support reproducible research insights.

## Projects

**Revolutionizing Scalp Disease Detection using Integrating SCSAEN Classifier with Secretary Bird Optimization for Enhanced Diagnostic Precision Using Deep Learning**

- Developed scalp condition detection system combining Stacked Convolutional Sparse Autoencoder Network (SCSAEN) classifier with Secretary Bird Optimization.
- Used deep learning for improved feature extraction and classification accuracy.
- Achieved high diagnostic precision on medical scalp image datasets via optimized hyperparameters.

**EA-DRNet: A Next-Generation Edge-Aware Deep Residual Architecture for Intelligent and Low-Latency Heart Disease Prediction**

- Designed a heart disease prediction pipeline integrating K-means clustering, VGG-19 feature extraction, and EA-DRNet classification.
- Applied edge-aware residual learning to enhance feature quality and reduce prediction latency.
- Attained an overall accuracy of 70% on the UCI heart disease dataset.

## Education

**M.E, Computer Science and Engineering** (Pursuing) 2024 - 2026

M.I.E.T. Engineering College, Tiruchirappalli
